正の数 負の数 たし算と引き算

名前

1 正負の数の引き算を計算をしましょう。

$$\begin{aligned} \textcircled{1} (+6) - (+2) &= \square + \square \\ &= \square \end{aligned}$$

$$\begin{aligned} \textcircled{2} (-4) - (+1) &= \square + \square \\ &= \square \end{aligned}$$

$$\begin{aligned} \textcircled{3} (+5) - (-3) &= \square + \square \\ &= \square \end{aligned}$$

$$\begin{aligned} \textcircled{4} (-8) - (-6) &= \square + \square \\ &= \square \end{aligned}$$

正負の数の引き算

引く数の符号をかえて、
たし算に直して計算します。

2 次の計算をしましょう。

$$\textcircled{1} (+6) - (+5) = \square$$

$$\textcircled{2} (-3) - (+6) = \square$$

$$\textcircled{3} (+2) - (-4) = \square$$

$$\textcircled{4} (-9) - (-3) = \square$$

$$\textcircled{5} (+3) - (+7) = \square$$

$$\textcircled{6} (-2) - (+8) = \square$$

$$\textcircled{7} (+6) - (-7) = \square$$

$$\textcircled{8} (-4) - (-2) = \square$$

$$\textcircled{9} (+8) - (-3) = \square$$

$$\textcircled{10} (-5) - (-2) = \square$$
